

Coupling-Ansatz Sensitivity Atlas - VALIDATE

(center+edge, $v=[5,10,20]$, realizations=5, full validate) | Ranking: mean $\rho=0.84$ | Quadrant: mean agreement 36%

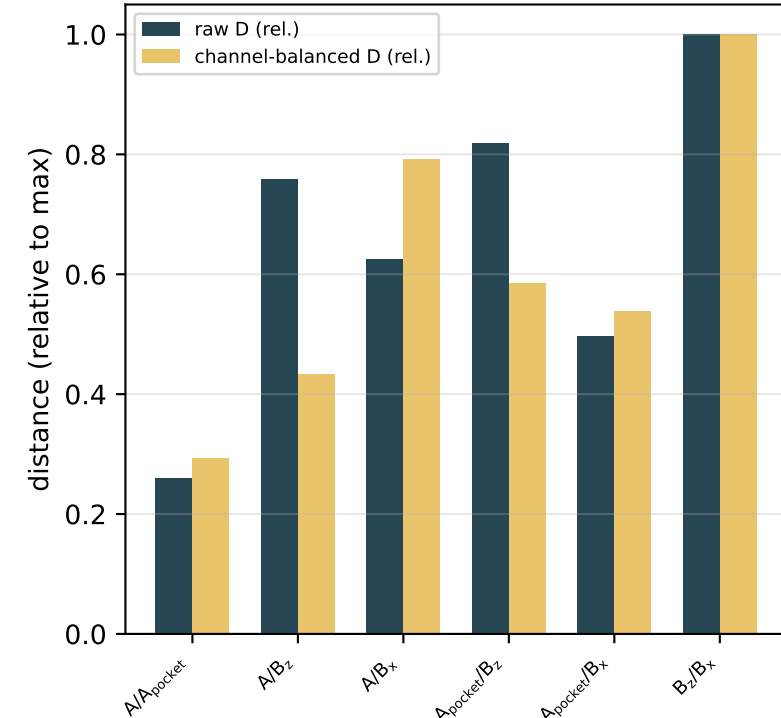

(1) Rank correlation
(partial ansatz-dependence)

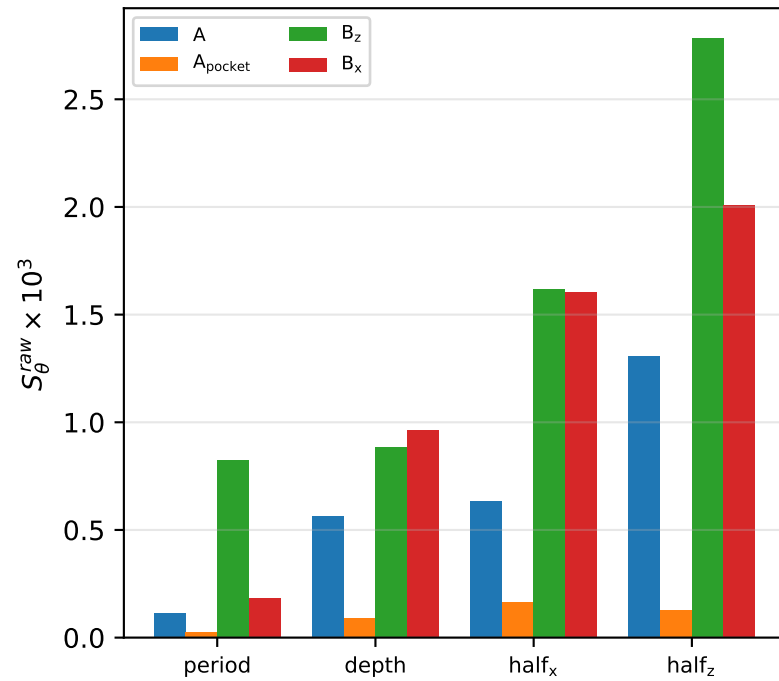

(2) Quadrant agreement
(stronger ansatz-dependence)

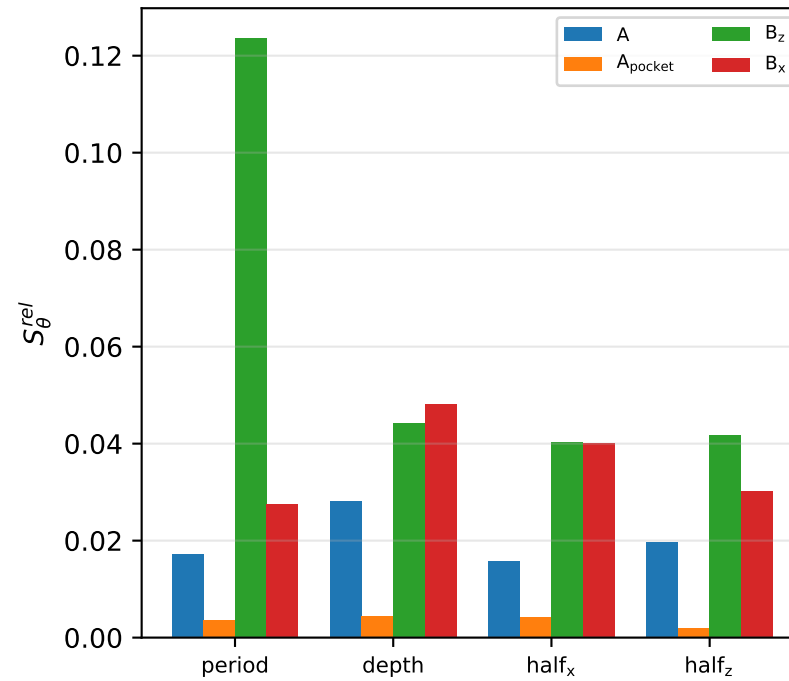

(3) Model distance
(B_z vs B_x largest; ranking reorders)

(4a) Raw geometry sensitivity
(half_z dominant)

(4b) Relative geometry sensitivity
(no shared hierarchy; B_z : period largest)

(5) $A \rightarrow A_{\text{pocket}}$ quadrant shift
(69 disagreement conditions)
